

ALL THE RIGHT TYPE 3.0 AVAILABLE NOW!

Dear Parent or Guardian:

As you may know, the District's standard (C level grade) for keyboarding is 30 words per minute at 90 percent accuracy by the end of 8th grade. At Dryden, keyboarding is one part of the Technology curriculum. Many parents have asked if the school could order *All The Right Type*, the keyboarding program the school uses, for home use. I am please to announce that our order has come in and we have a limited number of copies available for purchase at \$23.95. *All The Right Type 3.0* is the latest version; the hybrid CD works on Windows and Mac computers. If you are interested, please send a check made out to Floyd Dryden Middle School with your student and I will give them a copy. If more checks come in than copies available, I will order more. Thanks, and happy keyboarding!

Sincerely,

Sheila Degener and Alan Degener
Technology Instructors

Minimum System Requirements:

Windows:

Pentium 75MHz processor or better (133MHz recommended)
Windows 95, 98, Me, NT 4, 2000, or XP
